

BEACON STAFF UPDATE

In order to have BEACON continue to evolve in a continually changing and dynamic environment, it is imperative to have an organizational structure that reflects enhanced communication, decision making and shared responsibilities within the BEACON network and beyond.

Therefore, effective June 1, 2009, the organizational structure of BEACON will be:

Joseph D. Bronzino
President & Founder

Joe is also the Vernon Roosa Professor of Applied Science at Trinity College, Hartford, CT.

Theresa Wilson
Co-Executive Director

Terri joined BEACON six years ago coming from a background in government relations.

Donald Peterson
Co-Executive Director

Don is also an Assoc. Prof. of Medicine at UConn and Director of the Biodynamics Lab at UConn Health Center.

This reorganization will enable any of the three administrators to speak for BEACON. It will facilitate the interchangeability that occurs with shared responsibilities, and not be dependent on one individual. We remain committed to continually enhance the BEACON network by facilitating matches, providing educational opportunities and assisting emerging companies in achieving the next step of commercialization.

The future of developing and commercializing new medical technology is bright. We all believe this reorganization will enable BEACON to play a major role in this process.

We thank you for your support and encouragement over the past nine years and we hope to see you soon at one of our many events!
